BRAND STORY

When the sterling image of the World Trade Center brand – emblazoned on one of its hundreds of prestigious locations – catches your eye, what do you think of?

Some will think of the physical locations, standing tall over the world's most important cities. Others will think of innovation and entrepreneurship, and the accomplishments of the association's elite members. Still more will draw to mind its esteemed history, as the most influential hub of international commerce in the world.

Although the WTCA is world-famous for many reasons, there remains one common thread through it all: building connections. The WTCA builds connections and networks that are greater than the sum of their parts. It's a mutually-supporting ecosystem of businesses and individuals that is always growing, always learning, and always thriving: building the future of international trade.
